Full Face Mask

Introducing the FFM 1600 Full Face Mask. Protective, comfortable and lightweight, our Full Face Mask is available in 3 sizes, with a full range of filters, spares and accessories.

Engineered for Performance

Performance is at the heart of Corpro. Our FFM 1600 combines a low burden airflow system, swept-back filter positioning and a separated oronasal cavity into a high performance respirator with an optimised centre of gravity, ultra-low breathing resistance and an unobstructed field of view

Better design, better performance

Designed for Comfort

We've designed the FFM 1600 for comfort. Our Full Face Mask combines a five-point head harness with elastomeric sealing components, using our global fit profiling data to create a respirator with unrivalled fit and comfort. Combined with our ultra low breathing resistance, users stay comfortable for longer.

Better comfort, better fit, better protection.

Ultra Low Breathing Resistance

The breathing resistance of the equipment can affect performance and comfort. We've designed our Full Face Mask with a low burden airflow system, twin inhale valves and low pressure-drop filters, creating a system with ultra low breathing resistance.

Breathe easily, stay protected for longer.
