

LOTUS TECH PACK™

Built specifically for rope access technicians, the Lotus Tech Pack is a combination backpack and duffel bag that zips open from all sides and lays flat for maximum access to essential equipment. With 4 exterior pockets and 7 interior pockets, personal kit is easily organized and prepared for the job. Items are readily visible inside the mesh pockets, which are placed over the contrasting light gray background of the Lotus interior. A protective storage sleeve is provided for stowing a laptop, ipad, or other surface. Versatile gear loops and compression straps are sewn into the pack in key areas and removable in others, enhancing equipment storage.

Named after the iconic Lotus Tower, this pack is designed for working at height and taking abuse. The durable exterior is Double Ripstop Nylon with Carbonate coating on both sides for superior abrasion and water resistance. Heavy duty zippers around the Lotus are fitted with reflective pulls and stored in protective garages. The Lotus includes removable waist belt and a ground cloth to protect gear as it comes out of the pack. Born to travel, the Lotus has a business card / team card holder, Velcro strip for patches and ID, and fits nicely in overhead bins. Take it anywhere, anytime, for any job.

Features:

- Designed to carry personal kit and essential technical equipment
- Zips completely flat to provide immediate access to organized gear
- Opens on the top, bottom, and side to easily reach buried items
- Configure as a duffel or backpack with comfortable, breathable suspension
- Snap buttons for stowing shoulder straps and Velcro for stowing duffel handle
- 4 exterior pockets located on different aspects of the bag
- 7 interior pockets: 1 mesh stow, 5 mesh zip, 1 large zip
- Protective storage sleeve for laptop, ipad, or other surface
- Gray interior provides contrast to see stowed equipment
- Sewn gear loops on the outside and removable gear loops inside
- Versatile exterior straps attach in multiple configurations
- Additional straps for compression and carrying more equipment
- Ground cloth included in lower side pocket for laying out gear
- Waist belt can be removed when carrying light loads or traveling
- Reflective zipper pulls and protective garages for zipper storage
- Business / team card holder, fits CMC's [Rope Bag Card Set](#)
- Velcro strip for patches and other personal identification
- Sized to fit inside overhead bins on airplanes
- Main fabric: 840D (denier) Nylon Double Ripstop with Carbonate coating on both sides

- Carbonate is a specialized PU coating that is very durable and has superior abrasion and water resistance
- Interior fabric: Nylon 210T (tex) Taffeta Ripstop with water-resistant coating
