

Products, training and operational support services for professional work at height and rescue

Rope access kit

WK22

Completely new range of rope devices with advanced specifications.

The work kit is designed to be used straight out of the bag. Features our new, innovative rope devices Prism and Quantum. This work kit has been recently updated to include a 4 step foot loop in place of the three step, and a triple action alloy krab to replace the steel screwgate used with the descender.

Axon full body harness with added shoulder pads. The Axon is a sophisticated multi-use harness with high degree of lumbar support. Designed for rope access and rope rescue. Quick connect leg buckles for rapid fitting.

Ascenders have high load ratings with double attachment holes.

Individual products in this kit:

- Axon - Rope Access Harness
- Quantum Back-up Device
- PRISM Descender
- Duon Technical climbing helmet
- Pulsar - X-Cam Handled Ascender
- Twist - X-Cam Chest Ascender
- Personal kit bag with 7kg WLL
