

**Blast Armour** protects for painting and sandblasting.

**Benefits:**

- \* Quality flange raised face protection
- \* Reduces flange refacing cost
- \* Improved Predictability / reliability
- \* Quick and easy use
- \* No sticky residue left behind
- \* Raised face or full face sizes available

**Uses:**

- \* Pipe spools / equipment flanges
- \* Construction projects

**No Tools Required**

**Magnetic Armour** protects through all fabrication processes.

**Benefits:**

- \* Magnetic flange protection
- \* Improves fabrication yield and throughput
- \* Reduces preparation time / costs
- \* Raised face or full face sizes available
- \* Quick and dependable protection
- \* Reduces flange refacing costs

**Uses:**

- \* Flange face protection
- \* Commissioning projects
- \* Turnarounds / shutdowns

**Flange Armour** is the premiere Flange Protection that reduces risk of flange defects and damage. Flange Armour reduces fabrication and capital costs, delivery times and improves site preservation.

**Flange Armour** is the future for Quality Flange Integrity Protection.

**Benefits:**

- \* Improved flange raised face protection
- \* Reduces defects and damage
- \* Reduces capital costs
- \* Reduces inspection time
- \* Improved Predictability / reliability
- \* Quick and easy use
- \* High visibility
- \* Improves fabrication yield and throughput
- \* Reduces fabrication costs
- \* Reduces shipping preparation time
- \* Reduces assembly time / costs
- \* Light weight
- \* Recyclable / Reusable
- \* Improves product delivery time

**Uses:**

- \* Pipe spools / equipment flanges
- \* Construction projects
- \* Warehouse / yard preservation
- \* Asset life cycle
- \* Valve flange face protection
- \* Commissioning / Immobilization
- \* Turnarounds / shutdowns
- \* High visibility for safe transportation

**No Tools Required**

- \* Reduced defects and damage
- \* Reduces refacing costs
- \* Improved assembly time / cost
- \* Improved shipping preparation time

**Custom Protection Design Consulting**

**Pipe Armour** is the new advanced technology in Pipe End Protection that improves current processes and eliminates current application frustrations experienced by facility personnel.

**Pipe Armour** pipe end protection advancements makes it the logical choice by companies. **Pipe Armour** is improving application processes, preparation and delivery times and is the future in Pipe End Protection.

- *Improved safety*
- *Faster application*
- *Reduces damage*
- *No tools needed*

**Benefits:**

- \* Advanced Design
- \* Improved Industry Practice
- \* Quick / Easy application
- \* Recyclable / Reusable
- \* Improved Predictability and reliability
- \* Reduced shipping preparation time
- \* Improves warehouse / yard preservation

**Uses:**

- \* Pipe transportation
- \* Facility / Construction projects
- \* Pipeline projects
- \* Sandblasting
- \* Valve pup piece protection
- \* Commissioning projects
- \* Warehouse / yard preservation
- \* Coating

**Material:**

- \* Polypropylene (Black)

**Custom Logo:**

- \* Corporate branding available
